

THE FIRST NAME IN QUALITY COUPLINGS

# Installation, Inspection, Operation & Maintenance Guide

## Model 20 Weld-On Drawbar Eye

## IMPORTANT

Read these instructions completely before installing, using or attempting to repair this product. If you have any questions, call Premier at (800) 255-5387 or (503) 234-9202.

## Selecting The Right Equipment

Whatever your application, selecting the proper equipment for the job is very important. Proper selection along with regular inspection and maintenance will help keep operating costs minimal while providing long life to each component. Below are general guidelines for selecting Premier Couplings and Drawbar Eyes. If you feel that your application is unique, please give Premier a call so that we may help you through the selection process.

Follow these four steps to ensure proper selection of Premier Couplings and Drawbar Eyes.

For "Double Trailer" configurations, only the rear trailer is considered when selecting your Premier Coupling or Drawbar Eye. In this example, a Coupling and Drawbar Eye with a "Gross Trailer Weight" rating of 40,000 lbs. (18,143 kg) would be the minimum rating acceptable for normal, over-theroad applications (see Tongue Weight section below).

Example only, each application may vary and should be considered unique.

For "Triple Trailers", only the two most rearward trailers are considered in selecting your Premier Coupling or Drawbar Eye. In this example, a Coupling and Drawbar Eye with a "Gross Trailer Weight" rating of 80,000 lbs. (36,287 kg) would be the minimum acceptable for normal, over-the-road applications (see Tongue Weight section below).

#### Step 2: Determine "Tongue Weight Capacity"

**"Tongue Weight Capacity"** is the maximum expected weight at the drawbar eye. If a hinged drawbar is used, the maximum weight will be approximately 1/2 the overall drawbar weight. If a non-hinged drawbar is used and the actual tongue weight is not known, you can approximate the weight by multiplying the GVWR of the towed trailer by 15%. However, each application is unique and the best practice is to weigh the tongue when the trailer is loaded to its GVWR.

#### Step 3: Considering Operating Conditions and Environments

Environments such as rough uneven roads or off-road use can dramatically increase shock loads to both drawbar eyes and couplings. In general, increasing the "Gross Trailer Weight" (Step 1:) and "Tongue Weight Capacity" (Step 2:) by a minimum of 25% will be sufficient for many applications. Even if an application is used off-road occasionally, the minimum increase necessary for Gross Trailer and Tongue Weight is 25%. Certain types of equipment and/or operating practices can also dramatically increase loads through equipment binding and/or improper loading practices. Of special concern is high tongue weight. However, each application is unique and every environment different, therefore your application may require more than 25%.

Once both "Gross Trailers(s) Weight" (Step 1:) and "Tongue Weight Capacity" (Step 2:) have been determined, evaluate your operating conditions and apply an appropriate margin of safety.

#### Step 4: Browse Premier Product Catalog

Browse the Premier Product Catalog and refer to the "Specifications" section of each product. Be sure to review the "Understanding Premier Load Specifications" section and "Coupling to Drawbar Eye Cross-Reference" sheet on the next couple pages.

### Selecting The Right Equipment

#### Understanding Premier Load Specifications

Each Premier product undergoes extensive design and testing prior to being introduced. We use the latest in Computer Aided Design and Analysis Software as well as physical destructive tests. Premier's published load specifications are the maximum load a given product or part will withstand without failure. Premier's testing procedures closely follow the Society of Automotive Engineers (SAE) guidelines of Recommended Practice for testing Couplings and Drawbar Eyes (SAE J847 & J849).

life of couplings and drawbar eyes (details in catalog). In accordance with Premier and the Federal Motor Carrier Safety Regulations, these were designed to identify wear at the critical percentages of 18% and 20%, by measuring the crosssection of coupling hooks (horn) and drawbar eye loops. 18% wear indicates that

the product should be replaced as soon as possible. At 20% wear, the product is no longer in usable condition and must be taken out of service immediately and replaced. The latch gage bar measures the gap space between the top of the coupling hook and the closed latch. If the 3/8" latch gage bar can pass between this region, then the latch components should be considered worn past safe limits and replaced. Please note that these wear gage specifications are in accordance with Premier Mfg. Co. and the Federal Motor Carrier Safety Regulations (refer to other manufacturer's specifications for wear limits on their products).

Premier also provides Installation Guides for each of our major products. These help guide you through installation, inspection, routine maintenance and part replacement. Another resource is our website at **www.premier-mfg.com**. Here you will find Installation Guides, Service Guides, distributor locations, online catalogs, product information, trade show schedules and links to trucking resources.

'The Harder You Work It, The Harder It Gets"

#### "Premalloy" - Premier's Exclusive Alloy

**"The harder you work it, the harder it gets"** best describes how Premalloy performs. Premalloy actually work hardens at the contact surfaces during normal use, which results in longer service life. Premalloy is highly recommended for off-road and aggregate type applications due to its wear resistant characteristics. Many of Premier's couplings are made from this exclusive material. As you are browsing the catalog, look for the Premalloy icon next to the product photos to determine which models are made of this material.

## Selecting The Right Equipment

## Coupling to Drawbar Eye Cross Reference Chart

#### † Saf-Tite Product

#### \* Industrial Application

**CAUTION:** Verify that both the coupling's and drawbar eye's rated capacities meet your application(s) requirements.

## Model 20 Weld-On Drawbar Eye

SPECIFICATIONS AND LOAD CAPACITIES

#### SAFETY WARNING

This product is designed for towing under normal conditions within the stated gross trailer weight. Do not overload or abuse this product. Overloading or abuse may lead to property damage, severe injury, or death.

## Max. Gross Trailer Weight: 100,000 lbs. (45,359 kg) Maximum Tongue Weight: 15,000 lbs. (6,803 kg) Inside Diameter: 2 3/8 in. (60 mm) Unit Weight: 13.5 lbs. (6.1 kg)

#### ACCESSORIES

#### **Optional Accessories**:

- 14005 (1 5/8") Wear Gage: Used to determine if the eye has worn beyond its intended service life.

#### INSTALLATION

#### Installation Procedure:

- The 20 Drawbar Eye must be installed to comply with the Federal Motor Carrier Safety Regulations. Specifically, Section 393.70, Paragraph C: "Towing of Full Trailers." Prior to install or operation, consult with local, State and Federal agencies, as there may be additional applicable laws governing installation and use of this product.
- 2. One of the three attached Welding Procedure Specifications; GMAW, SMAW or FCAW, must

be followed. Welding should only be performed by a certified welder skilled in structural welding practices.

- 3. All weld locations must be clean, paint free and void of any moisture, oil, grease, oxides or loose or thick scale.
- 4. The 20 Drawbar Eye is designed for a front end structure consisting of two 3" square tubes, or channel. The two side weld tabs may be heated and then spread or collapsed to accommodate front end geometries with angles ranging from 20° to 50° (see Figure 1).

## Model 20 Weld-On Drawbar Eye

#### INSTALLATION

- structure with a minimum 3/8" fillet weld that 5. Fit-up, between the front end structure and the mounting surfaces of the 20 Drawbar Eye, encompasses the entire interface between the must be flush as failure to have a flush fit drawbar eye and front end structure as shown in prior to welding will cause the capacities to be Figure 2 and in the bottom view of Figure 1. negatively affected. SIDE WELD TAB Figure 1 DRAWBAR EYE 20 PREMIER 20° TD 50 NO TOP VIEW BOTTOM VIEW NO - GAP (INCORRECT) K GAP (INCORRECT) FIG. 1A FIG. 1B Figure 2 20 PREMIER SIDE VIEW TOP VIEW **INSPECTION / OPERATION / MAINTENANCE**
- Visually inspect the drawbar eye for cracks, impact damage and/or deformation before each and every use. Do NOT use if any of these conditions exist.
- 2. If the original cross-section of the eye loop has been reduced by 20% or greater, the drawbar eye is NOT to be used and is considered out-of-service.
- 3. This product is designed to be operated within its free rotation limits. It is the responsibility of the vehicle

designer/end user to assure that these limits are not exceeded (not binding/jackknife).

- 4. WARNING: Prior to towing, make certain that adequately rated safety chains have been properly connected.
- 5. Never weld on any Premier drawbar eye in order to repair damaged or worn areas. Field and/or shop weld repairs are inadequate and may further weaken the drawbar eye.

#### **IMPORTANT GUIDELINES that apply to all Premier Weld-On Drawbar Eyes**

- Never attempt weld repair of damaged or worn drawbar eyes
- Air adjusted drawbar eyes must be used with an air service chamber or #500 slack adjuster
- Clean and inspect drawbar eyes and eye assemblies for damage or excessive wear before each and every use
- Structure to which eye is attached must be of sufficient strength to withstand load rating of eye
- All welds for attaching eye should be done by a certified welder skilled in structural welding
- Do not bind-up (Jackknife) any application as stresses can cause damage to products
- or components, resulting in failure and detachment of the trailer while in use
- Do not apply lubricants to the coupling hook or drawbar eye loop, as they can cover
- up possible damage and accelerate wear

(1) VERIFY THAT BOTH COUPLING'S AND (8) DO NOT APPLY LUBRICANTS TO THE COUPLING DRAWBAR EYE'S RATED CAPACITIES MEET HOOK OR DRAWBAR EYE LOOP, AS THEY YOUR APPLICATION(S) REQUIREMENTS. CAN COVER UP POSSIBLE DAMAGE AND ACCELERATE WEAR. (2) DO NOT OVERLOAD COUPLING OR DRAWBAR EYE. (9) ALWAYS ABIDE BY ALL APPLICABLE STATE AND FEDERAL REGULATIONS GOVERNING SAFE (3) INSPECT COUPLING, LATCH AND DRAWBAR AND PROPER TRANSPORTATION. EYE FOR CRACKS, BENDING DAMAGE OR EXCESSIVE WEAR. DO NOT USE IF ANY OF (10) NEVER STRIKE ANY OF THESE COMPONENTS **THESE CONDITIONS EXIST!** WITH A HAMMER OR ANY OTHER DEVICE. (4) CHECK FOR GAP BETWEEN CLOSED LATCH (11) ALWAYS VERIFY PROPER OPERATION AND TOP OF HORN OR COUPLING BALL. OF LATCHING SYSTEM AND COUPLING DO NOT USE IF GAP IS 3/8 IN. OR MORE. COMPONENTS PRIOR TO DRIVE OFF. (5) MAKE SURE COUPLING IS LATCHED AND THAT (12) NEVER USE A COUPLING THAT YOU DO NOT LATCH WILL NOT OPEN. FULLY UNDERSTAND HOW TO PROPERLY OPERATE AND VERIFY SECURE LATCHING OF. (6) PRIOR TO USE, ALWAYS CONNECT SAFETY (13) NEVER REPLACE ANY PART IN ANY OF CHAINS OF ADEQUATE STRENGTH FOR LOAD(S) BEING TOWED. PREMIER'S ASSEMBLIES WITH NON-PREMIER COMPONENTS. DOING SO WILL VOID ALL (7) DO NOT BIND-UP (JACKKNIFE) ANY WARRANTY AND POTENTIALLY COMPROMISE APPLICATION AS STRESSES CAN CAUSE THE UNIT'S INTEGRITY, WHICH COULD RESULT DAMAGE TO THE COUPLING, DRAWBAR EYE, IN PROPERTY DAMAGE, SERIOUS INJURY, OR OTHER COMPONENTS OR ANY COMBINATION DEATH. OF THEM. JACKKNIFING MAY RESULT IN FAILURE OF PRODUCTS OR COMPONENTS, **RESULTING IN DETACHMENT OF THE TRAILER** WHILE IN USE.

**WARRANTY:** We warrant all Premier products to be free from defects in material or workmanship for one year. We will repair or replace, at our option, any Premier product which our examination reveals to be defective, provided that the product is returned to our factory, at Tualatin, Oregon transportation prepaid, within one year of purchase by the first retail purchaser. Our warranty does not extend to products which have been subject to misuse, neglect, improper installation, maintenance or application, nor does our warranty extend to products which have been repaired or altered outside of Premier's facility unless the repair or alteration has been expressly authorized in writing by Premier. *This warranty is in lieu of all other warranties, express or implied, and excludes warranties of merchantability, fitness for a particular purpose and otherwise, and in no event will Premier be liable for incidental, special, contingent or consequential damages.*
